SECURITY INFORMATION

DECLASSIFIED

2. The Commanding Officer, U.S.S. BAIROKO (CVE-115), was Commander Task Element 95.11 from 2100I four (4) March to 2100I thirteen (13) March 1952 at which time the Command of the Task Element was shifted to the Commanding Officer, HMS GLORY. During the reporting period, TE 95.11 consisted of one escort carrier and a maximum of three (3) DD's acting as screening vessels. The screen was reduced to less than three (3) ships when required by operational demands. The mission of this Task Element was to conduct operations in support of the United Nations Blockade, West Coast of Korea, the United States Eighth Army in Korea (USAM) and to render search and rescue assistance as required.

3. The enemy forces were the North Korean People's Army and "Volunteer Chinese Communist Forces" in enemy-held North Korea. No enemy surface or Air Forces were encountered by this Task Element and, therefore, no surface or air action is related. However, enemy small craft operating in the rivers, estuaries, and along the West Coast of Korea were attacked and destroyed by aircraft of this Element when directed or as targets of opportunity.

4. During this operating period VMA-312 aircraft flew armed reconnaissance, Target Combat Air Patrol, Combat Air Patrol, pre-briefed strikes, Air Spot for Naval gunfire, and Photo Reconnaissance missions as illustrated by schedule, enclosure (1). Flight Operations were carried out for the entire nine (9) days scheduled. However, on the last day, the last two (2) flights were cancelled due to weather. During these nine (9) days VMA-312 aircraft flew 360 combat sorties plus six (6) aborted and five (5) administrative flights. There was a total of 779.2 combat hours flown for an overall average of 86.6 hours and forty (40) sorties per day. The squadron aircraft allowance was twenty four (24), the total average aircraft flyable on board twenty two (22), and the total average aircraft availability eighteen (18).

5. During this operating period ships of Task Element 95.11 operated in the Korean Coastal Area Nan in the vicinity of Latitude 37° 30' N. and 124° 30' E. Several of the destroyers in the screen were replaced on a routine rotational basis. Those that participated in this periods patrol were HMCS CAYUGA (D-218), HMS CONCORD (D-03), U.S.S. SOUTHERLAND (DDR-743), HMAS BATAAN (D-191), and the U.S.S. D.A. MUNRO (DE-422).

PART II - CHRONOLOGICAL ORDER OF EVENTS

040648I The U.S.S. BAIROKO (CVE-115) with VMA-312 embarked was underway for Operating Area Nan, off the West Coast of Korea, with the HMCS CAYUGA (D-218), in company.

14 March - HMCS CAYUGA (D-218), HMAS BATAAN (D-191) in company with U.S.S. BAIROKO (CVE-115) in transit from operating area West Coast Korea to Sasebo, Japan.

141150I Launched four (4) VMA-312 aircraft for ITAMI.

141330I Exercised crew at General Quarters and conducted anti-aircraft gunnery exercises.

141810I Entered the harbor of Sasebo, Japan.

PART III - PERFORMANCE OF ORDNANCE MATERIAL AND EQUIPMENT INCLUDING AMMUNITION EXPENDITURES

(A) Performance of Ordnance Material and Equipment

1. No undue difficulties were experienced in the handling of ordnance.

2. Fifteen (15) 500 lb. general purpose bombs failed to explode on impact. Four (4) of the fifteen (15) aircraft carrying these bombs failed to return arming wires. One (1) 500 lb. bomb was dropped safe by pilot. It was definitely established that one dud was caused by electrical trouble. Three (3) 1000 lb. G.P. bomb duds were reported. All arming wires of these three (3) bombs were returned except one tail arming wire. The arming solenoids of the a/c carrying these three (3) bombs checked out satisfactorily. The above reported duds used the following fuzes with the delay timing as indicated: AN-M101A2 (.01 sec. delay)-1; AN-M101A2 (.25 sec. delay)-14; AN-M103A1 (inst.)-3; AN-M139 (inst.)-12; AN-M139 (.01 sec. delay)-3; AN-M102A2 (1025)-2.

3. Five (5) Napalm duds were reported. Three (3) of these duds were the MK-77 tanks. Failure of the three (3) MK-77 fire bombs was attributed to the following: double arming wires being secured to the after arming solenoid and the arming solenoid pin being sprung allowing the arming wire to pass under the pin when the switch was on Armed. The two other bombs were the Japanese manufactured tanks. The reason for their failure to ignite is undetermined.

3.5" W.P. rockets - - - - -	272
Napalm - - - - -	41
.50 caliber belted ammunition - - - - -	241,415

PART IV - SUMMARY OF OWN AND ENEMY BATTLE DAMAGE

(A) Own Battle Damage.

1. None of the ships of the Task Element sustained battle damage.

2. For damage sustained by aircraft see Naval Air Warfare Report (OPNAV 336.5 revised 4-51) submitted for this operating period.

(B) Battle Damage Inflicted on the Enemy.

1. Ships of this Task Element inflicted no damage on the enemy while operating as part of screen during the period covered by this element.

2. For battle damage inflicted on the enemy by aircraft of the Task Element see Naval Air Warfare Report (OPNAV 336.5 revised 3-51) submitted for this operating period.

PART V - PERSONNEL PERFORMANCE AND CASUALTIES

(A) Personnel performance was considered to be excellent.

(B) Casualties.

1. On five (5) March 1952 Captain K. L. DODSON 035671 USMC while flying an F4U-4 BUVR 96879 failed to return to the ship. The plane is reported to have lost its port wing due to enemy anti-aircraft flack.

SECURITY INFORMATION

DECLASSIFIED

The plane upon losing its wing rolled over and crashed into the ground scattering parts of the aircraft over a large area. The approximate position of the plane crash is Latitude  $38^{\circ} 05' N.$  and Longitude  $125^{\circ} 16' E.$  Accompanying pilots report that there is little possibility that Captain DODSON survived. He was therefore reported killed in action.

2. In the afternoon of five (5) March 1952 Captain Jack DEITZ USMC while on a combat mission and flying F4U-4 BUHR 31706 encountered enemy flack resulting in damage to the plane, forcing the pilot to bail out at Latitude  $38^{\circ} 40' N.$  Longitude  $125^{\circ} 08' E.$  Pilot suffered no injuries. The pilot was picked up by a rescue helicopter, Pedro Tara, stationed at Dentist Charley and delivered to Paengnyong-Do where, on seven (7) March 1952 DEITZ was picked up by the U.S.S. BAIROKO (CVE-115) helicopter and returned to the ship.

3. In the afternoon of 10 March 1952 Captain C. W. TUXBURY USMC 024940 encountered heavy machine gun fire Latitude  $38^{\circ} 50' N.$  Longitude  $125^{\circ} 10' E.$  while flying an F4U-4 on a combat mission. The pilot was forced to bail out at Latitude  $38^{\circ} 47' N.$  and Longitude  $125^{\circ} 06' E.$  The helicopter based at Dentist Charley again picked up pilot and delivered the pilot to the island of Cho Do where he was flown to K-16 to be picked up by GODFISH and returned to the U.S.S. BAIROKO (CVE-115).

(C) Personnel Requirements and Individual Department Comments.

1. Previous comments made in Action Report for period 15 February through 26 February dated 3 March are considered to be still valid. The following additional personnel requirements are submitted:

a. Medical Department

At the present time the number of personnel in the department is too low to properly perform all functions and to fill general quarters station billets. Recommend bringing personnel complement up to allowance by adding 1 HM2, 1 HM3, and 1 SN.

b. Operations Department

In view of the increase in communication traffic while operating in this area it is recommended that the following rates be added to allow the communication division to function properly: 1 RML, 3 RM2, 1 RM3, 1 RLSN, 4 RMSA.

PART VI - COMMENTS AND RECOMMENDATIONS

1. From an overall viewpoint it is considered that the operations of the U.S.S. BAIROKO (CVE-115) with VMA-312 embarked, as part of T.E. 95.11 for the period 4 March through 14 March 1952, were conducted in a satisfactory manner. It is felt that the primary mission of the Task Element, that of providing the necessary air cover in the enforcement of a seaward and coastwise blockade of the West Coast of Red held Korea, was effectively accomplished.

2. Due to pilots in-experience in aerial photography, and antiquated, jury rigged equipment a considerable amount of precious time and effort was wasted in attempting to get suitable aerial photographs of areas containing suspected troop build ups, and well camouflaged gun emplacements. It is recommended that an aerial photographic unit be attached to CVE type Aircraft Carriers operating in this theater of operations.
