1. Command Composition and Organization:

a. Mission: USS BARRY (DDG 52) is equipped with the most advanced naval weapons system in the world. AEGIS, a computerized, quick reaction air defense system, provides extraordinary capabilities against attacking aircraft and missiles. The heart of the AEGIS system is the SPY radar which automatically detects and tracks virtually everything that is within 200 miles.

BARRY's Vertical Launching System (VLS) can launch both the land attack Tomahawk cruise missile and the Standard surface-to-air missile. One forward five-inch gun mount can be used against threatening ships or to bombard shore targets.

BARRY also has the most advanced underwater surveillance system available today. Our suite of antisubmarine warfare (ASW) equipment consists of a hull mounted sonar, acoustic array sonar, and a helicopter data link which can receive information on the location of submarines and surface ships miles away.

BARRY is propelled by powerful gas turbine engines allowing her to cruise at over 30 knots. Overall she is a diverse and extremely capable warship.

b. Organizational Structure: BARRY's organization consists of a commanding officer, executive officer, six departments and sixteen divisions. (encl. 1)

c. Captain: Commander William P. Bingham, USN (Assumed Command on 01 AUG 00 from Commander John M. Chandler, USN)

d. Permanent Duty Station: Norfolk Naval Station, Norfolk, VA

3. Narrative:

TEAM BARRY has had a very successful year by any standards. The year started slow, with holiday and POM leave periods and final preps for deployment, but then the tempo shot straight up on 03 APR 00 when BARRY began a 6 month MED/MEF Deployment that would take her to 3 continents, 9 countries and 13 port visits.

Subj: USS BARRY (DDG 52) COMMAND HISTORY FOR 2000

One look at our Chronology and it is easy to see that BARRY was on the "Tip of the Spear" the entire time she was deployed. Exercises such as NADORS and Kunjar Hadd allowed BARRY to work with the Navies of Great Britain, France, Oman, and Tunisia. While operating in the Arabian Gulf, BARRY was called on to fill a whole host of roles; patrolling the waters of the Northern Arabian Gulf looking for Oil Sanctions Violators with MIO Teams at the ready, and acting as alternate Air Warfare Commander for the EISENHOWER Battle Group to name a few. This is a testament to the tenacity and flexibility of the crew. ESWS qualifications were a Command priority throughout the deployment, BARRY was able to qualify 95% of her First and Second Class Petty Officers. After receiving a hero's welcome when BARRY returned to Norfolk, VA on 01 OCT 00, the crew enjoyed some well deserved rest and began a 4 month Pier Side Readiness Availability period. BARRY's mottos are "Strength and Diversity" and "We Take Care of Our People, We Accomplish the Mission." TEAM BARRY exemplified both of these during the year 2000.
