Subj: USS BARRY(DDG 52) COMMAND HISTORY FOR 2002

1. Command Composition and Organization:

A. Mission: The USS BARRY is equipped with the most advanced naval weapons system in the world. AEGIS, a computerized, quick reaction air defense system, provides extraordinary capabilities against attacking aircraft and missiles. The heart of the AEGIS system is the SPY radar, which automatically detects and tracks virtually everything that is flying beyond 200 miles.

BARRY's Vertical Launching System (VLS) can launch both the land attack Tomahawk Cruise Missile and the Standard surface-to-air missile. One forward five-inch gun mount can be used against threatening ships or to bombard shore targets.

BARRY also has the most advanced underwater surveillance system available today. Our suite of Anti-submarine Warfare (ASW) equipment consist of a hull mounted sonar, acoustic array sonar, and a helicopter datalink which can receive information on the location of submarines and surface ships miles away.

BARRY is propelled by powerful gas turbine engines allowing her to cruise at over 30 knots. Overall she is a diverse and extremely capable warship.

B. Organizational Structure: BARRY's organization consists of a Commanding Officer, Executive Officer, five departments and eighteen divisions.

C. Captain: Commander T. E. Culton, USN (Assumed Command on 22 FEB 02).

D. Permanent Duty Station: Norfolk Naval Station, Norfolk, VA.
