3. Narrative.

ROBERT G. BRADLEY started the year 1998 with a deployment

Enclosure (1)

in support of Standing Naval Forces Atlantic (SNFL). As part of SNFL, the BRADLEY supported the continuing NATO mission of naval presence in the Northern Atlantic. The crewmembers of ROBERT G BRADLEY found serving with NATO to be challenging yet very rewarding. Crewmembers were able to enjoy liberty in countries all over Europe and North America.

ROBERT G. BRADLEY spent most of March above the Arctic Circle participating in STANAVFORLANT operations and Exercise Strong Resolve '98. Crewmembers of the BRADLEY observed the traditional celebration of introducing sailors to the kingdom of Boreas Rex, the Realm of the Arctic Circle, hosted by "True Bluenoses." By paying respects to the ruler of ice and snow, these sailors were given the privilege of enjoying the frozen domain and became ambassadors for the polar world. As ROBERT G. BRADLEY completed Strong Resolve '98, word came of being awarded the Supply Blue and Engineering Red "E" for excellence.

In June, the ROBERT G. BRADLEY participated in exercise MARCOT/UNIFIED SPIRIT off the coast of Newfoundland, Canada. MARCOT was a simulated expeditionary peace enforcement operation sponsored by the United Nations and led by NATO. The purpose of MARCOT was to simulate multi-threat littoral warfare in support of amphibious operations. MARCOT proved to be one of largest exercises of the deployment and involved a total of 48 warships, 100 aircraft and 15,000 active participants.

On July 2, ROBERT G. BRADLEY returned to its homeport and crewmembers were reunited with family and loved ones. The following weeks were a period of leave and upkeep as crewmembers enjoyed some well-deserved rest and relaxation. By August, the ROBERT G. BRADLEY was back in action providing escort duties for the towing of a Nuclear Training Submarine (MTS-635) from Norfolk Naval Shipyard to its homeport in Charleston, SC. The USS GRAPPLE was the primary tow ship with RGB providing security and a secondary tow asset in the event of casualty. The operation was a success and CAPT Polefrone, Commanding Officer, Nuclear Power Training Unit, Charleston SC, commended RGB for its exceptional professionalism and performance. The crew ended a week long operation by enjoying two days of liberty in Charleston.

In September, the ROBERT G. BRADLEY traveled to New Orleans for Labor Day weekend in honor of the American Legion's 80th convention. The BRADLEY participated in the convention by representing the Navy at various American Legion functions, including a reception hosted by the officers and chiefs of the BRADLEY. When the crewmembers of RGB were not giving tours or attending receptions, they were exploring the city. Liberty in New Orleans was outstanding as RGB crewmembers enjoyed the many different sights, sounds and tastes of the Big Easy.

September 28th marked the beginning of ROBERT G BRADLEY's Restricted Availability (RAV). During the RAV, RGB underwent a complete refurbishment. Among the many items renovated during the RAV were the ship's mast, flight deck, focsle and Operations

department berthing. September 28th also marked the beginning of the Mayport Naval Station's Surface Warfare Training (SWT) Week. The ROBERT G. BRADLEY won the overall competition and finished in first place in the areas of Operations, Damage Control and Engineering. The flags from the competition will be displayed on RGB until the next year's SWT week competition in 1999.

The ROBERT G. BRADLEY continued its rigorous schedule throughout the remaining months of 1998 as she went through PLOT I, PLOT II, PLOT III, LOA, LMA and AVCERT. Before the ROBERT G. BRADLEY ended the year with the Christmas leave period, she traveled to Yorktown, VA to onload weapons in preparation for work-ups and a 1999 counter-drug deployment in the Caribbean basin. Upon her return from Yorktown, the BRADLEY had steamed a total of 40,076 miles in 1998.
