STATION LISTING FORMAT

The below example covers the majority of units/activities which may be aboard a base or station of the naval aeronautical shore establishment. Not all categories are applicable and station commanders need only list those categories which pertain. Use on board counts. Unique situations affecting base support requirements may be listed at the station commander's discretion. For the purposes of these reports, "naval activities" denote both Navy and USMC units. When changes are minor in nature, it is requested that the updated report be carefully and legibly updated by pen and ink changes. SUBMISSION OF THE 1 OCTOBER 1986 UPDATES TO THIS DOCUMENT WILL CONFORM TO THE FORMAT OF THE EXAMPLE STATION LISTING SET FORTH BELOW.

NOTE 1/ Where a subordinate unit and its parent unit are listed aboard the same station, each unit (subordinate or parent) will report only personnel assigned to its respective unit.

NOTE 2/ In any category, if an activity conducts student training, under that category state the average number of students by type (officer/enlisted) and service (USN/R or USMC/R).

OPNAVNOTE C5400

DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK

The planned Naval Aviation Shore Establishment, including Marine activities, for 1 October 1985 is reflected in the assigned missions of individual activities. These missions are promulgated and revised by the OPNAV Notice 5450 series. As directed by OPNAV Instruction 5450.171, it is the responsibility of Echelon 2 Commanders to promulgate functions and tasks for each activity under their command in support of the assigned mission. NAVAIR Instruction series 5451 contains a list of approved tasks for each activity under Naval Air Systems Command. Permanent duty stations of Naval units are contained in the effective edition of OPNAV Instruction 3111.14.

AIRCRAFT ON BOARD STATIONS

Operating allowances, and inventory by unit and model are published semi-annually in OPNAV NOTICE C3110 (Blue Book). Base aircraft data contained in this Notice reflect an on board (including home base deployed) count as of the date of the covering letter 1 October. On board estimates are submitted by air stations and facilities a month or two in advance. Detailed accounting of aircraft in storage or undergoing rework at Naval Air Rework Facilities can be obtained from the Blue Book.

NAVY MANPOWER ALLOCATION

Tables on pages 5-10 of this publication include a Fiscal 1986 summary of the personnel allocations for aviation activities as of 1 October 1985. Personnel figures shown for the individual stations and activities reflect an estimated on board count as of 1 October 1985. Estimates are prepared within a month or two of the 1 October date.

Personnel data for USNR/USMCR squadrons/units represent numbers allowed in drill pay status. Active duty personnel (TARS and USN) associated with Reserve activities are shown separately.

COMMAND OVER SHORE ACTIVITIES

The exercise of command over a shore (field) activity has as its primary purpose the provision of effective support to the forces of the United States Navy and of the United States Marine Corps. It encompasses over-all authority, direction, control and coordination necessary to carry out the assigned mission, and responsibility for the operating efficiency of the activity. It includes authority and responsibility for mission planning, shore activity planning and workload planning. It also includes authority and responsibility for coordination the application of the various elements of support. Mission and facilities planning for shore (field) activities shall be accomplished with the guidance and assistance of commands, bureaus and offices assigned support responsibilities, and with the technical advice of other commands, bureaus and offices. Administrative and technical guidance shall include:

- a. The establishment of standards and procedures for specialized administrative or technical functions;
- b. Professional and technical advice, guidance, and assistance;
- c. Performance of specialized administrative or technical functions as a service.

Supervision by Staff Assistants over assigned shore (field) activities encompasses the same degree of authority and responsibility as command. (SECNAVINST 5400.14A)

TECHNICAL SUPPORT TO COMMANDS AND ACTIVITIES

Technical support is a term denoting the responsibility of various systems commands, bureaus and offices within the Navy to provide resources to a command or activity of the Navy or Marine Corps to enable it to carry out its mission. It includes administrative, personnel and material support, guidance and assistance in and evaluation of such matters as organization, procedures, budgeting, accounting, staffing and the utilization of personnel funds, material and facilities. In addition, technical support includes the responsibility to assist command in evaluating the operating efficiency of activities. (SECNAVINST 5400.14A)

TYPES OF NAVAL AIR STATIONS

NAVAL AIR STATION

An independent activity that provides aircraft operating, maintenance, training and personnel facilities in accordance with organizational requirements.

NAVAL STATION

A shore activity capable of performing general functions, usually in direct support of the operating forces.

MARINE CORPS AIR STATION

An independent aviation activity developed to provide permanent facilities for a war strength Marine Aircraft Wing and station forces, less the units deployed at subordinate Marine Corps Air Facilities and any Marine Corps Auxiliary Landing Field. A Marine Corps Air Station possesses facilities for maintenance work beyond the scope of the capabilities of the dependent fields. It acts as the supply stock point as designated for the subordinate airfields and air facilities to be supported and budgets and manages the funds for maintenance and operations for all assigned subordinate airfields and is under the command of the appropriate Commander, Marine Corps Air Bases.

NAVAL AIR FACILITY

An activity established to meet some special requirement of naval aviation. It may or may not be administratively dependent on a parent (air or nonair) activity, in accordance with organizational requirements.

AUXILIARY LANDING FIELD

An airfield having limited facilities, additional to the landing area in operation. It is designated as such by the Chief of Naval Operations to provide an airfield which can serve as: a staging base for gunnery, ordnance, or other training exercises; a mirror or other landing practice site; or emergency or "Bingo" field in support of off-shore carrier operations, and/or a base, with limited support, for assigned aircraft or units. The facilities and/or services may include any or all of the following as appropriate to usage and/or user requirements: air traffic control, communications, fire and crash rescue services, personnel berthing and messing, refueling and rearming equipment, ready issue stowage, line operations, line maintenance, high usage line maintenance spare parts and limited support of assigned aircraft or units. An ALF is not a separately established activity but is under the cognizance of a nearby parent (air or non-air) activity from which personnel, material and funds for its support are allocated. The parent activity may maintain a caretaker detachment and/or service unit at the ALF for day-to-day operations.

UNCLASSIFIED

UNCLASSIFIED

OPNAVNOTE C5400

DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK (Continued)

OUTLYING LANDING FIELD (HELICOPTER OUTLYING LANDING FIELD (H) OLF)

An air field having no established facilities in operation except a landing area. It is designated as such by the Chief of Naval Operations to provide a landing area on which aircraft based elsewhere can conduct landing practice or other exercises. An OLF is not a separately established activity but is under the cognizance of a nearby parent air station from which personnel, material and funds for its support are allocated. No personnel are permanently based at an OLF. However, required air traffic control and/or crash rescue personnel, or others appropriate to support the operations to be conducted, along with mobile facilities as required to supplement existing facilities, may be located at the OLF either on a "duration of the operation" or a "normal operating hours" basis.

THE STATUS OF NAVAL AIR ACTIVITIES

SOURCE: OPNAVINST 5450.169D 20 Apr 1982

ACTIVE

Development. A non-operating condition during the construction or preparation period.

Fully Operational. Adequate personnel and facilities to support the assigned mission and planned operations.

Maintenance. Minimum personnel and facilities to support emergency or intermittent operations and maintenance of equipment in an operating or preserved condition. Additional personnel will achieve fully operational status.

Partial Maintenance. Minimum personnel for security, fire protection and maintenance. Maintains minimum facilities and utilities essential for occasional use by operating forces in an operable or preserved condition. Operating units provide additional personnel and equipment necessary during such use.

INACTIVE

Mobilization. This designation identifies real property of a non-operating shore activity retained for mobilization purposes. The major claimant who establishes the requirement for the "mobilization" designation is responsible for physical security, fire protection, and static maintenance (timely correction of defects conducive to accelerated deterioration).

Excess. This designation identifies real property of a shore activity being processed as excess to the needs of the Navy. The major claimant to whom the "excess" shore activity was assigned when active is responsible for physical security, fire protection and static maintenance until final disposal of the real property. The major claimant is also required to advise the CNO (OP-09B2E) of final disposal of the real property. CNO (OP-09B2E) will then modify Section 4 of the SNDL CAT.

NAVAL AEROSPACE MEDICAL INSTITUTE

NAVAL AEROSPACE MEDICAL INSTITUTE

Location: Naval Air Station, Pensacola, Florida

Mission: To provide professional and technical support and consultative service in operationally related Fleet and Fleet Marine Force medical matters worldwide; to conduct education and training programs for Medical Department personnel in the various operational medical disciplines; to manage, coordinate, and provide selected operational programs and services in support of the Operating Forces as directed by higher authority.

Program: I. Training. The training program consists of education and training for medical officers in aerospace medicine, qualifying them for designation as Naval Flight Surgeons, providing education and training in aerospace physiology for Medical Service Corps officers for designation as Aerospace Physiologists; providing education and training in aerospace experimental psychology for Medical Service Corps officers for designation as Aerospace Experimental Psychologists; conducting a residency program for education and training Flight Surgeons for certification in Aerospace Medicine by the American Board of Preventive Medicine; and training Hospital Corps personnel as technical assistants for Flight Surgeons and Aerospace Physiologists, qualifying them for the designation of Aerospace Medicine Technicians and Aerospace Physiology Technicians.

Training Load:

Graduates of the Naval Aerospace Medical Institute are annually programmed to average approximately as follows:

<u>TITLE</u>	<u>NUMBER</u>
*Flight Surgeons	85
Aerospace Medicine Technicians	130
Aerospace Physiology Technicians	25
Aerospace Medicine Residents	3
Aerospace Experimental Psychologists	3
Aerospace Physiologists	10

* In addition to Naval medical officers, graduates include medical officers of the U. S. Army, U. S. Public Health Service, civilian personnel of the Federal Aviation Agency and the National Aeronautics and Space Administration, and medical officers of foreign countries.

Program: II. Professional Services. The Naval Aerospace Medical Institute provides examining facilities to determine the physical fitness of personnel for admission to and retention in the following schools:

- a. Naval Aviation Training Program
- b. Naval Aircrew Candidate School
- c. Student Flight Surgeon School
- d. Naval Air Traffic Controller School
- e. Aviation Physiology School
- f. Naval Diving and Salvage Training School
- g. Naval Submarine School

The command also performs annual and special physical examinations for retirement, separation, discharge, reenlistment, post-hospitalization, post-Medical Board, and fitness to continue flying of other aviation military personnel stationed at NAS Pensacola and as required by the Naval Medical Command regulations or as directed by higher authority. In addition, the command provides the following special services: performing annual aviation physical examinations for Army Reserve and Air Force Reserve aviation personnel stationed in the surrounding area; and providing professional and clerical

assistance necessary to process cases referred to the Special Board of Flight Surgeons. Finally, this command maintains the Aerospace Advisory Council, a focus of aeromedically trained, operationally experienced, clinical specialists for consultative support and review of programs, problems, and instructions in matters of aeromedical medicine to higher authority.

Program: III. Aviation Physical Qualifications. The command has the Physical Qualifications Branch previously located at the Naval Medical Command. This division evaluates certain flight physicals for all aviation programs, Navy and Marine Corps. These physical forms are endorsed with a recommendation as to the individual's fitness to fly. Close liaison is maintained with the Office of the Chief of Naval Operations; Commander, Naval Military Personnel Command; Commandant of the Marine Corps; and Commander, Navy Recruiting Command, in matters relative to the physical status of aviation personnel. A complete microfiche file system is maintained on all Aviation Class I and selected Class II personnel. Cases are processed and referred to the Naval Military Personnel Command for aviation waivers. Telephone and written consultative support is given in response to requests by Flight Surgeons and other practitioners of aerospace medicine throughout the naval establishment worldwide.

Program: IV. Repatriated Prisoner of War Program. On 1 October 1980, the command assumed responsibility for coordinating all of the studies previously conducted by other activities on former Navy and Marine Corps prisoners of war. This department is now responsible for continuing long-term studies regarding the health and fitness of former prisoners of war. The subjects in the program consist of 141 Navy or ex-Navy men and 37 Marine Corps or ex-Marine Corps men, all former POWs. A match group of men who were not prisoners of war is being followed using the same protocol. The studies will attempt to determine whether findings in the prisoners of war groups are captivity related or may be found in a general cohort. In the course of this program, extensive annual physicals and psychiatric studies are being completed.

Program: V. Iranian Hostage Program. In September 1981, the command assumed responsibility for follow-up examinations of the Navy and Marine Corps personnel taken hostage when the U. S. Embassy in Tehran was overrun. The studies being conducted are identical to those done on the repatriated prisoner of war groups -- to determine whether there are captivity related disabilities.

Program: VI. Operational Medicine Support. This department provides a central point of expertise for the development of the Naval Aviation Physiology Training Program (NAPTP) and acts as the Aviation Training Model Manager of the NAPTP. It has as a primary mission the development and submission of the mission-oriented NAPTP curricula based on the needs of the TYCOMS. The department serves as technical advisor and establishes and coordinates priority on fleet-oriented audiovisual programs. The department manages the screening, procurement, and shipment of equipment needed for the NAPTP from the Defense Property Disposal Office. Two special programs assigned by OPNAV are the preparation and revision of the survival NATOPS manual (00-80T-101) and NATOPS mechanicals for the Emergency Egress Section 5 of flight manuals.

Program: VII. Operational Psychology. This department is responsible for operations and management of selection testing of applicants to naval aviation officer training, prediction of performance in aviation training and analyses related to selection, and prediction and performance assessment in training and operational aviation missions, and the training of Aerospace Experimental Psychology students.

The U. S. Navy and Marine Corps Aviation Selection Test is a battery of four tests to be used as a primary screening device for selecting applicants to naval aviation training programs. It is administered by recruiting personnel to some 40,000 applicants per year. The Operational Psychology Department is responsible for controlling test materials, processing test answer sheets, verifying scores, maintaining test reliability and validity, and assuring compliance with policy guidance regarding test administration, minimum cut-off scores and requirements for retesting.

The Secondary Prediction System consists of a series of regression equations based upon grades already attained. It is used in response to inquiries from training officers and appropriately constituted boards to assist in student assignments and dispositions.

Studies and analyses are performed in order to maintain the selection and prediction programs, and in response to recruiting, training and operational issues related to the prediction and assessment of performance in aviation missions. This function requires the maintenance and operation of the following three data banks: the Selection Test Data Bank which contains all applicant test data which is coded on U. S. Navy and Marine Corps Aviation Selection Test answer sheets; the Flight Student Data Bank which contains performance data for naval aviation students throughout their undergraduate training; and the Human Factors Data Bank which contains data which is required for specific projects and has applicability to anticipated project requirements. This data is collected over a specified time interval, as distinguished from the continuous data collection required for the other two data banks.

Program: I. Research. The laboratory supports naval aviation through research in biomedical assessment of aircrew performance, as well as the development of performance-based standards for selection and classification of aircrewmembers. Emphasis is placed on physical, physiological (cardio-pulmonary, visual vestibular and auditory), and cognitive information processing research. A major effort of the laboratory is the definition and elimination of health hazards arising from operational environments (acceleration, chemical and biological factors, radiation, and extremes in temperature and pressure). Improvement of human factors specifications for design of aircraft weapon systems is another major product line. Aeromedical research is greatly facilitated by the availability of selected aviation personnel from CNET and CNATRA who voluntarily serve as experimental subjects. In addition, the Laboratory maintains a nonhuman primate breeding colony for Navy medical and Department of Defense research efforts.

II. Special Projects. The Naval Aerospace Medical Research Laboratory maintains close liaison with and provides consultative services to other Department of Defense laboratories and commands, the Department of Transportation, the National Aeronautics and Space Administration, and other governmental agencies. It is a member of the Tri-Service Aeromedical Research Panel, which facilitates interservice cooperative work, and participates actively in the NATO Advisory Group for Aerospace Research and Development. Two new product lines involving the use of therapeutic drugs in aviation designated personnel, and chemical defense antidotes' effects on aviation performance have commenced this year. All of the data collection are performed in the operational environment facilitated by using mobile field laboratories with automated testing modules. The current field testing site is the TACTS range at NAS Oceana.

Naval Oceanography Centers are assigned geographic areas of responsibility for environmental services. In these areas they perform the functions of data collection and dissemination of analyses, forecasts and warnings (See NAVOCEANCOMINST 3140.1 series). The Naval Eastern Oceanography Center (NAVEASTOCEANCEN) and Naval Western Oceanography Center (NAVWESTOCEANCEN) are responsible for the administration of all COMNAVOCEANCOM assets (excluding ships and aircraft) in the Atlantic/Mediterranean and Pacific/Indian Ocean (including adjacent land areas), respectively. The Naval Polar Oceanography Center provides environmental forecasting services for the Arctic and Antarctic areas. In addition, it is assigned specialized tasks, such as ice reconnaissance coordination and forecasting, as well as liaison with the National Meteorological Center and the National Environmental Satellite Service to facilitate the exchange of products and services.

4. Naval Oceanography Command Center Guam (Command - NAVWESTOCEANCEN) Naval Oceanography Command Center Rota (Command - NAVEASTOCEANCEN)

Mission: To provide, within areas of responsibility as assigned by the Commander Naval Oceanography Command, operational Oceanographic services to the Armed Forces of the Department of Defense.

Naval Oceanography Command Centers are assigned geographic sub-areas of responsibility for environmental services (See NAVOCEANCOMINST 3140.1 series). In these areas they perform the functions of data collection and dissemination of analyses, forecasts and warnings. They have the additional function of command of assigned Naval Oceanography Command Detachments (NAVOCEANCOMDETs).
