SPECIAL STATION LISTING FORMAT

The below example covers the majority of units/activities which may be aboard a base or station of the naval aeronautical shore establishment. Not all categories are applicable and station commanders need only list those categories which pertain. Use on board counts. Unique situations affecting base support requirements may be listed at the station commander's discretion. For the purposes of these reports, "naval activities" denote both Navy and USMC units. SUBMISSION OF THE 1 OCTOBER 1976 (three months) and 1 APRIL 1977 (6 months) UPDATES TO THIS DOCUMENT WILL CONFORM TO THE FORMAT OF THE EXAMPLE STATION LISTING SET FORTH BELOW.

NOTE 1/ Where a subordinate unit and its parent unit are listed aboard the same station, each unit (subordinate or parent) will report only personnel assigned to its respective unit.

NOTE 2/ In any category, if an activity conducts student training, under that category state the average number of students by type (officer/enlisted) and service (USN/R or USMC/R).

DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK

The planned Naval Aviation Shore Establishment, including Marine activities, for 1 July 1976 is reflected in the assigned missions of individual activities. These missions are promulgated and revised by the OPNAV Notice 5450 series. As directed by OPNAV Instruction 5450.171, it is the responsibility of Echelon 2 Commanders to promulgate functions and tasks for each activity under their command in support of the assigned mission. NAVAIR Instruction series 5451 contains a list of approved tasks for each activity under Naval Air Systems Command. Permanent duty stations of Naval units are contained in the effective edition of OPNAV Instruction 3111.14.

AIRCRAFT ON BOARD STATIONS

Operating allowances, and inventory by unit and model are published monthly in OPNAV NOTICE C3110 (Blue Book). Base aircraft data contained in this Notice reflect an on board (including home base deployed) count as of the date of the covering letter (1 January or 1 July). On board estimates are submitted by air stations and facilities a month or two in advance. Detailed accounting of aircraft in storage or undergoing rework at Naval Air Rework Facilities can be obtained from the Blue Book.

NAVY MANPOWER ALLOCATION

Tables on pages 5-10 of this publication include a Fiscal 1977 summary of the personnel allocations for aviation activities as of 1 July 1976. Personnel figures shown for the individual stations and activities reflect an estimated on board count as of 1 July 1976. Estimates are prepared within a month or two of the 1 July date.

Personnel data for USNR/USMCR squadrons/units represent numbers allowed in drill pay status. Active duty personnel (TARS and USN) associated with Reserve activities are shown separately.

COMMAND OVER SHORE ACTIVITIES

The exercise of command over a shore (field) activity has as its primary purpose the provision of effective support to the forces of the United States Navy and of the United States Marine Corps. It encompasses over-all authority, direction, control and coordination necessary to carry out the assigned mission, and responsibility for the operating efficiency of the activity. It includes authority and responsibility for mission planning, shore activity planning and workload planning. It also includes authority and responsibility for coordination the application of the various elements of support. Mission and facilities planning for shore (field) activities shall be accomplished with the guidance and assistance of commands, bureaus and offices assigned support responsibilities, and with the technical advice of other commands, bureaus and offices. Administrative and technical guidance shall include:

- a. The establishment of standards and procedures for specialized administrative or technical functions;
- b. Professional and technical advice, guidance, and assistance;
- c. Performance of specialized administrative or technical functions as a service.

Supervision by Staff Assistants over assigned shore (field) activities encompasses the same degree of authority and responsibility as command. (SECNAVINST 5400.14)

OPNAVNOTE C5400

DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK (Continued)

TECHNICAL SUPPORT TO COMMANDS AND ACTIVITIES

Technical support is a term denoting the responsibility of various systems commands, bureaus and offices within the Navy to provide resources to a command or activity of the Navy or Marine Corps to enable it to carry out its mission. It includes administrative, personnel and material support, guidance and assistance in and evaluation of such matters as organization, procedures, budgeting, accounting, staffing and the utilization of personnel funds, material and facilities. In addition, technical support includes the responsibility to assist command in evaluating the operating efficiency of activities. (SECNAVINST 5400.14)

TYPES OF NAVAL AIR STATIONSNAVAL AIR STATION

An independent activity that provides aircraft operating, maintenance, training and personnel facilities in accordance with organizational requirements.

NAVAL STATION

A shore activity capable of performing general functions, usually in direct support of the operating forces.

MARINE CORPS AIR STATION

An independent aviation activity developed to provide permanent facilities for a war strength Marine Aircraft Wing and station forces, less the units deployed at subordinate Marine Corps Air Facilities and any Marine Corps Auxiliary Landing Field. A Marine Corps Air Station possesses facilities for maintenance work beyond the scope of the capabilities of the dependent fields. It acts as the supply stock point as designated for the subordinate airfields and air facilities to be supported and budgets and manages the funds for maintenance and operations for all assigned subordinate airfields and is under the command of the appropriate Commander, Marine Corps Air Bases.

NAVAL AIR FACILITY

An activity established to meet some special requirement of naval aviation. It may or may not be administratively dependent on a parent (air or nonair) activity, in accordance with organizational requirements.

AUXILIARY LANDING FIELD

An airfield having limited facilities, additional to the landing area in operation. It is designated as such by the Chief of Naval Operations to provide an airfield which can serve as: a staging base for gunnery, ordnance, or other training exercises; a mirror or other landing practice site; or emergency or "Bingo" field in support of off-shore carrier operations, and/or a base, with limited support, for assigned aircraft or units. The facilities and/or services may include any or all of the following as appropriate to usage and/or user requirements: air traffic control, communications, fire and crash rescue services, personnel berthing and messing, refueling and rearming equipment, ready issue stowage, line operations, line maintenance, high usage line maintenance spare parts and limited support of assigned aircraft or units. An ALF is not a separately established activity but is under the cognizance of a nearby parent (air or non-air) activity from which personnel, material and funds for its support are allocated. The parent activity may maintain a caretaker detachment and/or service unit at the ALF for day-to-day operations.

DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK (Continued)

OUTLYING FIELD (HELICOPTER OUTLYING FIELD (H) OLF)

An air field having no established facilities in operation except a landing area. It is designated as such by the Chief of Naval Operations to provide a landing area on which aircraft based elsewhere can conduct landing practice or other exercises. An OLF is not a separately established activity but is under the cognizance of a nearby parent air station from which personnel, material and funds for its support are allocated. No personnel are permanently based at an OLF. However, required air traffic control and/or crash rescue personnel, or others appropriate to support the operations to be conducted, along with mobile facilities as required to supplement existing facilities, may be located at the OLF either on a "duration of the operation" or a "normal operating hours" basis.

THE STATUS OF NAVAL AIR ACTIVITIES

SOURCE: OPNAVINST 5450.169B 22 Jan 76

ACTIVE

Development. A non-operating condition during the construction or preparation period of an activity.

Fully Operational. Adequate personnel and facilities to support the assigned mission and planned operations.

Maintenance. Minimum personnel and facilities to support emergency or intermittent operations and maintenance of equipment in an operating or preserved condition. Fully operational status can be achieved by addition of personnel.

Partial Maintenance. Minimum personnel for security, fire protection and maintenance. Minimum facilities and utilities essential for occasional use, when required by operating forces, are maintained in an operable or preserved condition. Additional personnel and equipment necessary during such use are to be provided by the operating units.

INACTIVE

Mobilization. This designation is utilized solely to identify real property of an non-operating shore activity retained for mobilization purposes. The major claimant who establishes the requirement for the "Mobilization" designation is responsible for physical security, fire protection and static maintenance (timely correction of defects conducive to accelerated deterioration).

Excess. This designation is utilized solely to identify real property of a shore activity being processed as excess to the needs of the Navy. The major claimant to whom the "Excess" shore activity was assigned when active is responsible for physical security, fire protection and static maintenance until final disposal of the real property, in accordance with applicable directives.

NAVY MANPOWER REQUIREMENTS

NAVAL WEATHER SERVICE

1. Fleet Numerical Weather Central (Command - DIRNAVOCEANMET)
(Support - OMN & OPN, DIRNAVOCEANMET - RDT&E, NAVAIRSYSCOM)

Mission: To provide, on an operational basis, numerical meteorological and oceanographic products peculiar to the needs of the Department of the Navy; and to develop and test numerical techniques to solve meteorological and oceanographic analytical and forecasting problems as directed by DIRNAVOCEANMET (formerly COMNAVWEASERV).

The Fleet Numerical Weather Central (FLENUMWEACEN), Monterey is the master computer center and hub of the Navy Environmental Data Network (NEDN). The NEDN includes high-speed data links connecting computers at various Fleet Weather Centrals (FLEWEACENS) and at Fleet Weather Facility (FLEWEAFAC), Suitland, Maryland. It is linked with the data collection networks of the U. S. Air Force and the National Oceanic and Atmospheric Administration (NOAA), and provides world coverage.

2. Fleet Weather Central (Command and Support - DIRNAVOCEANMET)

Mission: To provide, within areas of responsibility as assigned by the Director, Naval Oceanography and Meteorology, detailed meteorological and related services to the Department of the Navy and Oceanographic forecast to the Armed Forces of the Department of Defense.

Fleet Weather Centrals, under Commanding Officers, are assigned geographic areas of responsibility in which they perform the functions of data collection, centralized computer processing and analysis, and dissemination of analyses, forecasts, warnings and ship routing information.

3. Fleet Weather Facility (Command and Support - DIRNAVOCEANMET)

Mission: To provide, within local and/or functional areas of responsibility as assigned by the Director, Naval Oceanography and Meteorology, detailed meteorological and related services to the Department of the Navy; to assist the Fleet Weather Centrals in the accomplishment of their missions as directed.

Fleet Weather Facility Suitland provides a weather forecasting service for the Arctic and Antarctic areas. In addition, it is assigned specialized tasks such as ice reconnaissance coordination and forecasting as well as liaison with the National Meteorological Center and the National Environmental Satellite Service to facilitate the exchange of products and services.

4. Naval Weather Service Facilities (Command and Support - DIRNAVOCEANMET)

Mission: To provide, within functional areas of responsibility as assigned by Director, Naval Oceanography and Meteorology, detailed meteorological and related services to the Department of the Navy; and to perform such other functions or tasks as may be directed by the Director, Naval Oceanography and Meteorology.

Naval Weather Service Facilities (NAVWEASERVFACs) provide meteorological/oceanographic services in the local area. They have the additional function of command and support of assigned Naval Weather Service Environmental Detachments (NWSEDs) and Naval Weather Service Detachments (NWSDs).

5. Naval Weather Service Environmental Detachments (Command and Support - Fleet Centrals/Naval Weather Service Facilities)

Mission: To provide, as directed and within local/functional areas of responsibility, meteorological and oceanographic services to military activities, staffs units, and to all transients at host stations.

Naval Weather Service Environmental Detachments (NWSEDs), under Officers in Charge, are established by the DIRNAVOCEANMET as subordinate units of Naval Weather Service Facilities; however, circumstances dictate that in certain cases they be made subordinate to Fleet Centrals/facility. They normally are located at Naval Stations and Naval Air Stations to provide environmental support to units and activities within their immediate geographic areas. Officers in Charge are ordered ADDU to appropriate local flag/general officers.
