## STATION LISTING FORMAT

The below example covers the majority of units/activities which may be aboard a base or station of the naval aeronautical shore establishment. Not all categories are applicable and station commanders need only list those categories which pertain. Use on board counts. Unique situations affecting base support requirements may be listed at the station commander's discretion. For the purposes of these reports, "naval activities" denote both Navy and USMC units. When changes are minor in nature, it is requested that the updated report be carefully and legibly updated by pen and ink changes. SUBMISSION OF THE 1 OCTOBER 1990 UPDATES TO THIS DOCUMENT WILL CONFORM TO THE FORMAT OF THE EXAMPLE STATION LISTING SET FORTH BELOW.

NOTE 1/ Where a subordinate unit and its parent unit are listed aboard the same station, each unit (subordinate or parent) will report only personnel assigned to its respective unit.

NOTE 2/ In any category, if an activity conducts student training, under that category state the average number of students by type (officer/enlisted) and service (USN/R or USMC/R).

## DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK

The planned Naval Aviation Shore Establishment, including Marine activities, for 1 October 1990 is reflected in the assigned missions of individual activities. These missions are promulgated and revised by the OPNAV Notice 5450 series. As directed by OPNAV Instruction 5450.171, it is the responsibility of Echelon 2 Commanders to promulgate functions and tasks for each activity under their command in support of the assigned mission. NAVAIR Instruction series 5451 contains a list of approved tasks for each activity under Naval Air Systems Command. Permanent duty stations of Naval units are contained in the effective edition of OPNAV Instruction 3111.14.

### AIRCRAFT ON BOARD STATIONS

Base aircraft data contained in this Notice reflect an on board (including home base deployed) count as of the date of the covering letter 1 October. On board estimates are submitted by air stations and facilities a month or two in advance.

### NAVY MANPOWER ALLOCATION

Tables on pages 5-10 of this publication include a Fiscal 1990 summary of the personnel allocations for aviation activities as of 1 October 1990. Personnel figures shown for the individual stations and activities reflect an estimated on board count as of 1 October 1990. Estimates are prepared within a month or two of the 1 October date.

Personnel data for USNR/USMCR squadrons/units represent numbers allowed in drill pay status. Active duty personnel (TARS and USN) associated with Reserve activities are shown separately.

### COMMAND OVER SHORE ACTIVITIES

The exercise of command over a shore (field) activity has as its primary purpose the provision of effective support to the forces of the United States Navy and of the United States Marine Corps. It encompasses over-all authority, direction, control and coordination necessary to carry out the assigned mission, and responsibility for the operating efficiency of the activity. It includes authority and responsibility for mission planning, shore activity planning and workload planning. It also includes authority and responsibility for coordination the application of the various elements of support. Mission and facilities planning for shore (field) activities shall be accomplished with the guidance and assistance of commands, bureaus and offices assigned support responsibilities, and with the technical advice of other commands, bureaus and offices. Administrative and technical guidance shall include:

- a. The establishment of standards and procedures for specialized administrative or technical functions;
- b. Professional and technical advice, guidance, and assistance;
- c. Performance of specialized administrative or technical functions as a service.

Supervision by Staff Assistants over assigned shore (field) activities encompasses the same degree of authority and responsibility as command. (SECNAVINST 5400.14A)

### TECHNICAL SUPPORT TO COMMANDS AND ACTIVITIES

Technical support is a term denoting the responsibility of various systems commands, bureaus and offices within the Navy to provide resources to a command or activity of the Navy or Marine Corps to enable it to carry out its mission. It includes administrative, personnel and material support, guidance and assistance in and evaluation of such matters as organization, procedures, budgeting, accounting, staffing and the utilization of personnel funds, material and facilities. In addition, technical support includes the responsibility to assist command in evaluating the operating efficiency of activities.  
(SECNAVINST 5400.14A)

### TYPES OF NAVAL AIR STATIONS

#### NAVAL AIR STATION

An independent activity that provides aircraft operating, maintenance, training and personnel facilities in accordance with organization requirements.

#### NAVAL STATION

A shore activity capable of performing general functions, usually in direct support of the operating forces.

#### MARINE CORPS AIR STATION

An independent aviation activity developed to provide permanent facilities for a war strength Marine Aircraft Wing and station forces, less the units deployed at subordinate Marine Corps Air Facilities and any Marine Corps Auxiliary Landing Field. A Marine Corps Air Station possesses facilities for maintenance work beyond the scope of the capabilities of the dependent fields. It acts as the supply stock point as designated for the subordinate airfields and air facilities to be supported and budgets and manages the funds for maintenance and operations for all assigned subordinate airfields and is under the command of the appropriate Commander, Marine Corps Air Bases.

#### NAVAL AIR FACILITY

An activity established to meet some special requirement of naval aviation. It may or may not be administratively dependent on a parent (air or nonair) activity, in accordance with organizational requirements.

#### AUXILIARY LANDING FIELD

An airfield having limited facilities, additional to the landing area in operation. It is designated as such by the Chief of Naval Operations to provide an airfield which can serve as: a staging base for gunnery, ordnance, or other training exercises; a mirror or other landing practice site; or emergency or "Bingo" field in support of off-shore carrier operations, and/or a base, with limited support, for assigned aircraft or units. The facilities and/or services may include any or all of the following as appropriate to usage and/or user requirements: air traffic control, communications, fire and crash rescue services, personnel berthing and messing, refueling and rearming equipment, ready issue stowage, line operations, line maintenance, high usage line maintenance spare parts and limited support of assigned aircraft or units. An ALF is not a separately established activity but is under the cognizance of a nearby parent (air or non-air) activity from which personnel, material and funds for its support are allocated. The parent activity may maintain a caretaker detachment and/or service unit at the ALF for day-to-day operations.

DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK (Continued)

## OUTLYING LANDING FIELD (HELICOPTER OUTLYING LANDING FIELD (H) OLF)

An air field having no established facilities in operation except a landing area. It is designated as such by the Chief of Naval Operations to provide a landing area on which aircraft based elsewhere can conduct landing practice or other exercises. An OLF is not a separately established activity but is under the cognizance of a nearby parent air station from which personnel, material and funds for its support are allocated. No personnel are permanently based at an OLF. However, required air traffic control and/or crash rescue personnel, or others appropriate to support the operations to be conducted, along with mobile facilities as required to supplement existing facilities, may be located at the OLF either on a "duration of the operation" or a "normal operating hours" basis.

## THE STATUS OF NAVAL AIR ACTIVITIES

SOURCE: OPNAVINST 5450.169D 20 Apr 1982

### ACTIVE

Development. An non-operating condition during the constriction or preparation period.

Fully Operational. Adequate personnel and facilities to support the assigned mission and planned operations.

Maintenance. Minimum personnel and facilities to support emergency or intermittent operations and maintenance of equipment in an operating or preserved condition. Additional personnel will achieve fully operational status.

Partial Maintenance. Minimum personnel for security, fire protection and maintenance. Maintains minimum facilities and utilities essential for occasional use by operating forces in an operable or preserved condition. Operating units provide additional personnel and equipment necessary during such use.

### INACTIVE

Mobilization. This designation identifies real property of a non-operating shore activity retained for mobilization purposes. The major claimant who establishes the requirement for the "mobilization" designation is responsible for physical security, fire protection, and static maintenance (timely correction of defects conducive to accelerated deterioration).

Excess. This designation identifies real property of a shore activity being processed as excess to the needs of the Navy. The major claimant to whom the "excess" shore activity was assigned when active is responsible for physical security, fire protection and static maintenance until final disposal of the real property. The major claimant is also required to advise the CNO (OP-09B2E) of final disposal of the real property. CNO (OP-09B2E) will then modify Section 4 of the SNDL CAT.

The training program consists of education and training for Medical Officers in aerospace medicine, qualifying them for designation as Naval Flight Surgeons; providing education and training in aerospace physiology for Medical Service Corps officers for designation as Aerospace Physiologists; providing education and training in aerospace experimental psychology for Medical Service Corps officers for designation as Aerospace Experimental Psychologists; conducting a residency program for education and training Flight Surgeons for certification in Aerospace Medicine by the American Board of Preventive Medicine; and training Hospital Corps personnel as technical assistants for Flight Surgeons and Aerospace Physiologists, qualifying them for the designation of Aerospace Medicine Technicians and Aerospace Physiology Technicians.

#### Training Load:

Graduates of the Naval Aerospace Medical Institute are annually programmed to average approximately as follows:

<u>TITLE</u>	<u>NUMBER</u>
Flight Surgeons	105
Aerospace Medicine Technicians	144
Aerospace Physiology Technicians	15
Aerospace Medicine Residents	5
Aerospace Experimental Psychologists	3
Aerospace Physiologists	10

Program: II. Professional Services. The Naval Aerospace Medical Institute provides examining facilities to determine the physical fitness of personnel for admission to and retention in the following schools:

- a. Naval Aviation Training Program
- b. Naval Aircrew Candidate School
- c. Flight Surgeon
- d. Naval Air Traffic Controller

### NAVAL AEROSPACE MEDICAL INSTITUTE Continued)

Program: III. Aerospace Physical Qualifications Directorate. This directorate is responsible for review of all applicants for all aviation programs for both Navy and Marine Corps personnel. In the case of personnel who are determined to be not physically qualified for flight duties, the directorate makes waiver recommendations to the Navy Military Personnel Command, Commandant of the Marine Corps or the Navy Recruiting Command as appropriate. Physical examinations on all designated aviation personnel are reviewed by this directorate tri-annually. Close liaison is maintained with the Office of the Chief of Naval Operations; Commander, Naval Military Personnel Command; The Commandant of the Marine Corps and the Commander, Navy Recruiting Command in matters relative to the physical qualification of aviation personnel. Microfilm records are maintained on all aviation designated personnel as well as all applicants to aviation programs. The directorate is also responsible for the maintenance and up dating of the aviation medicine research computer data base. Telephone and written consultative support is provided to aviation medicine practitioners world wide.

Program: IV. Repatriated Prisoner of War Program. On 1 October 1980, the Command assumed responsibility for coordinating all of the studies previously conducted by other activities on former Navy and Marine Corps prisoners of war. This department is now responsible for continuing long-term studies regarding the health and fitness of former prisoners of war. The subjects in the program consist of 141 Navy men and 37 Marines, all former POWs. A match group of men who were not prisoners of war is being followed using the same protocol. The studies will attempt to determine whether findings in the prisoners of war groups are captivity related or may be found in general cohort. In the course of the program, extensive annual physicals and psychiatric studies are being completed.

Program: V. Iranian Hostage Program. In September 1981, the Command assumed responsibility for follow-up examinations of the Navy and Marine Corps personnel taken hostage when the U. S. Embassy in Tehran was overrun. The studies being conducted are identical to those done on the repatriated prisoner of war groups -- to determine whether there are captivity related disabilities.

### MISSION FUNCTION STATEMENT

#### Aviation Physiology Programs Department (Code 33)

Mission: The Aviation Physiology Programs Department provides a central point of expertise for all aspects of the Naval Aviation Physiology Training Program (NAFTP). The department acts in behalf of the Commanding Officer as BUMED designated Aviation Training Model Manager (ATMM) for the NAFTP. The department is also the CNO designated ATMM for the emergency egress section of over 90 individual aircraft Naval Aviation Training Operating Procedures Standardization (NATOPS) Manuals, and for the NATOPS Survival Manual, NAVAIR 00-80T-101. The department keeps the Commanding Officer informed of the internal professional aspects and functions of the department, and maintains close liaison with other departments within the Command, including the Aviation Physiology Training Department and the Academics Department, to enhance the effectiveness of the entire program. The Aviation Physiology Programs Department annually conducts CNO mandated site evaluations of the CNO approved Aviation Physiology Training Units conducting the NAFTP throughout the Navy and Marine Corps.

## NAVAL AEROSPACE MEDICAL INSTITUTE

### NAVAL AEROSPACE MEDICAL INSTITUTE (Continued)

Aerospace Psychology Qualifications Department. This department is responsible for (1) management of testing programs for selecting applicants for aviation officer training; (2) management and operation of prediction systems for the quantitative prediction of performance of aviation personnel; (3) management of data files comprising the Aviation Selection Test Data Bank, the Human Factors Data Bank, and the Flight Student Data Bank; (4) conduct of studies and analyses related to selection, prediction, and performance assessment in training and operational aviation missions; (5) implementation and validation of updated versions of aviation selection tests; and (6) training Student Aerospace Experimental Psychologists.

The U.S. Navy and Marine Corps Aviation Selection Test is a battery of four test to be used as a primary screening device for selecting applicants to naval aviation training programs. It is administered by recruiting personnel to some 40,000 applicants per year. The Aerospace Psychology Qualifications Department is responsible for controlling test materials, processing test answer sheets, verifying scores, maintaining test reliability and validity, and ensuring compliance with policy guidance regarding test administration, minimum cut-off scores and requirements for retesting. Studies and analyses are performed in order to maintain the selection and prediction programs and in response to recruiting, training and operational issues related to the prediction and assessment of performance in aviation missions. This includes studies assessing minority performance to ensure compliance with Federal Equal Opportunity Guidelines. This function requires the maintenance and operation of the three data banks: the Selection Test Data Bank, which contains all applicant test data which is coded on U. S. Navy and Marine Corps Aviation Selection Test answer sheets; the Flight Student Data Bank, which contains performance data for naval aviation students throughout their undergraduate training; and the Human Factors Data Bank which contains data which are required for specific projects and has applicability to anticipated project requirements. These data are collected over specified time intervals, as distinguished from the continuous data collection required for the other two data banks. These data banks provide an integrated ADP management information system in support of tracking aviation student progress through all training phases.

## NAVAL AEROSPACE MEDICAL RESEARCH LABORATORY

### NAVAL AEROSPACE MEDICAL RESEARCH LABORATORY

Location: Naval Aerospace Medical Research Laboratory (NAMRL) is located on Naval Air Station, Pensacola, Florida and is a component of the Naval Medical Research and Development Command, National Naval Medical Center, Bethesda, Maryland.

Mission: To conduct research, development, test and evaluation in aviation medicine and allied sciences with the purpose of ensuring the health, safety, and readiness of Navy and Marine Corps aviation personnel.

Program: I. Research. As a human performance laboratory focusing on problems of naval aviation, NAMRL has an important and vital role in supporting fleet operations, aircrew selection, mission effectiveness, and aircraft design. The Laboratory conducts research in biomedical assessment of aircrewman performance, as well as the development of performance-based standards for selection and classification of aircrewman. Emphasis is placed on physical, physiological (cardio-pulmonary, visual, vestibular, and auditory), and cognitive information processing research. A major effort of the Laboratory is the definition and elimination of health hazards arising from operational environments (acceleration, chemical and biological factors, radiation, and extremes in temperature and pressure). Improvement of specification for design of aircraft weapons systems and aircraft protective systems is another major product line. Aeromedical research is greatly facilitated by the availability of selected aviation personnel from CNET, CNATRA, and MATSG who voluntarily serve as experimental subjects.

II. Special projects. The Naval Aerospace Medical Research Laboratory maintains close liaison with and provides consultative services to other Department of Defense laboratories and commands, the Department of Transportation, the National Aeronautics and Space Administration, and other governmental agencies. The Lab is a member of the Tri-Service Aeromedical Research Panel, which facilitates interservice cooperative work, and participates actively in the NATO Advisory Group for Aerospace Research and Development, and the Air Standardization Coordinating Committee Working Party 61, Aerospace Medical and Life Support Systems. Current projects focus on end products such as performance degradation countermeasures for sustained operations, validation of multidisciplinary research protocols for drug therapy, and validation of a physical conditioning program to increase G-tolerance. Other project areas include research on the effects of lasers on visual performance, visual detection of air-to-air missiles, and dosimetry methods for measuring radiation absorption from shipborne high power radio antennas. Other subject areas currently under investigation include spatial orientation, motion sickness, and G-tolerance (emphasizing sensorimotor and perceptual consequences). Data collection in the operational environment is expanding and is facilitated by using mobile field laboratories with automated testing modules.

The Naval Eastern Oceanography Center (NAVEASTOCEANCEN) and Naval Western Oceanography Center (NAVWESTOCEANCEN) are responsible for the administration of all COMNAVOCEANCOM assets (excluding ships and aircraft) in the Atlantic/Mediterranean and Pacific/Indian Ocean (including adjacent land areas), respectively. However, ships under Atlantic Fleet operational control between 70°W and 92°W will receive support from NAVEASTOCEANCEN. The Naval Polar Oceanography Center provides environmental forecasting services for Arctic areas. In addition, it is assigned specialized tasks, such as ice reconnaissance coordination and forecasting, and aviation weather support to NAF Andrews AFB, as well as liaison with the National Meteorological Center and the National Environmental Satellite Service to facilitate the exchange of products and services.

### 4. Naval Oceanography Command Center Guam (Command - NAVWESTOCEANCEN) NAVAL Oceanography Command Center Rota (Command - NAVEASTOCEANCEN)

Mission: To provide, within areas of responsibility as assigned by the Commander Naval Oceanography Command, operational Oceanographic services to the Armed Forces of the Department of Defense.

Naval Oceanography Command Centers are assigned geographic sub-areas of responsibility for environmental services (See NAVOCEANCOMINST 3140.1 series).
