OFFICE OF THE CHIEF OF NAVAL OPERATIONS
WASHINGTON, D.C. 20350

OPNAVNOTE 03110
OP-512D
Ser 02001P51
8 January 1969

~~CONFIDENTIAL~~ (For official use only upon declassification)

OPNAV NOTICE 03110

From: Chief of Naval Operations
To: Distribution List

Subj: Allowance and Location of Navy Aircraft (U)

Ref: (a) OPNAVINST 03110.1A (Navy Aircraft Program (Gray Book))
(b) OPNAVINST 5442.2B (Navy Aircraft Accounting System)
(c) NAVAIRINST 13100.7

1. (U) Purpose. To indicate the following by units.
 - a. The operating aircraft allowance
 - b. The actual on-hand aircraft inventories as of 30 November 1968

2. (C) General Instructions.

- a. This Notice establishes unit operating allowances of the Navy Aircraft Program within each major operating command. The allocation of Navy aircraft by model is reflected in reference (a), which establishes the allocations for major operating commands, in accordance with the approved planning factors and available inventory. In those instances where apparent inconsistencies occur between operating allowances and allocation, reference (a) shall be the controlling Instruction, since it represents the planned implementation of the aircraft program for which Congress approved and provided funds. Actual on-hand aircraft inventories are developed by reference (b). The Naval Air Reserve Training Command, as shown herein, has been established as a major command for aircraft logistics purposes only.

- b. If the allowances set forth are not deemed suitable for the mission which an activity or command must support, the Chief of Naval Operations will consider recommendations for changes in models and allowances of aircraft. However, any requests for such changes that would result in an increase in a major command's total aircraft operating allowance should contain that command's recommendation for a compensatory reduction.

- c. Specific assignment of aircraft to individual officers is prohibited by the Secretary of the Navy.

- d. Designation of aircraft listed herein are in conformance with reference (c).

- e. Planned operating levels of target drones (capable of carrying a pilot) are contained in reference (a).

GROUP 4 - Declassify on 30 November 1980

~~CONFIDENTIAL~~

3. (U) Cancellation. This notice is cancelled and may be destroyed by burning when the next issue is received. For record purposes, cancel 28 February 1969.

STATUS OF NAVY AIRCRAFT INVENTORY

Navy aircraft "inventory" is comprised of all aircraft which have been accepted, but not stricken, by the Navy. An aircraft is accepted when legal custody is assumed by the Navy, and is stricken when officially separated from Navy custody by the OPNAV Notice: "Separations From and Reinstatements to the Navy List of Aircraft".

Navy aircraft are presented herein under various combinations of three basic classifications: STATUS, CLASS and CONFIGURATION, and CUSTODY. "Status" refers to the classification of the functional employment or condition of the aircraft. The various STATUS codes (situations) by which Navy/Marine aircraft are classified appear in the Status Code Table included in this publication. Likewise, the table Naval Aircraft Classes, Subclasses and Models illustrate the current system of aircraft classification by CLASS and CONFIGURATION. Class of aircraft refers to the general mission purpose of aircraft design e.g. fighter, attack, patrol etc. Subclass refers to the next lower level of classification and more specific mission purpose or design e.g. fighter photo, recon etc. Custody refers to the unit (reporting custody) and command (controlling custody) to which the aircraft has been assigned.

GLOSSARY OF TERMS (AIRCRAFT)

- TOTAL INVENTORY** - All man-carrying Naval aircraft (including man-carrying drones) in the custody of all Navy and Marine organizations and units which have been accepted but not yet stricken. Total inventory may be divided into Program and Non-Program categories.
- PROGRAM AIRCRAFT** - All production aircraft in the physical custody of Navy and Marine units for which current or future operation within an authorized allowance is intended or can reasonably be expected. Stated differently, the program category includes operating, pipeline, stored (service life not completed), and aircraft in first delivery.
- NON-PROGRAM AIRCRAFT** - All aircraft of project development and service test (BIS) configuration, target drones (man-carrying), aircraft retired but not yet stricken (including aircraft stored with service life completed), and aircraft on loan or on bailment contracts. Drone Anti-Submarine Helicopters (DASH) are also included in this category.
- OPERATIONAL AIRCRAFT** - All program aircraft in the controlling custody of the operating commands (COMNAVAIRLANT, COMNAVAIRPAC, CNATRA, CNARESTRA, NAVAIRSYSCOM STF, and NAVAIRSYSCOM RDT&E) i.e., operating and operational pool aircraft.
- OPERATING AIRCRAFT** - This category includes aircraft in operating (A-) status and those awaiting operating status in the physical custody of an operating command (B1, B2, B3, B4, B5, B6, B7, B8, BJ BK). Operating status aircraft are those in custody of designated units for flight in performance of a Navy/Marine mission, and in direct assignment against an operating allowance assigned by OPNAV to the custodial unit. "Awaiting operating" includes only those aircraft in the physical and reporting custody of an operating command pending, and intended for, use in operating status. Aircraft in the awaiting operating category do not require rework prior to the assumption of operating (A-) status.
- PIPELINE** - Pipeline aircraft are those aircraft in the active inventory not available to the operating commands while in transit to depot maintenance, in depot maintenance undergoing scheduled or unscheduled rework, or in transit returning to the operating commands. It includes only non-operating, logistically active, program aircraft. More specifically, the Pipeline is comprised of Program aircraft enroute to, awaiting, and in rework; and those awaiting transit to and enroute to operating. Excluded from the Pipeline in addition to the operating category are (1) all non-program aircraft (2) Aircraft Stored with Service Life not completed (3) aircraft in process of first delivery and (4) those grounded administratively.
- NON-OPERATIONAL SUPPORT AIRCRAFT** - are those in the reporting custody of NAVAIRSYSCOM Fleet Support for purposes of rework.
- STORED, SERVICE LIFE NOT COMPLETE (Stored, SLNC)** - Aircraft with service life remaining but currently inactive and being held in storage (formerly, Reserve Stock).
- CONTINGENCY RESERVE** - These aircraft are those which have been retired from the program inventory as a consequence of completion of standard service life but which have been retained in the inventory to alleviate mobilization deficiencies. Only those aircraft are retained in contingency reserve for which spare part support is available for at least one more Standard Rework and one more service tour/period.
- STORED, SERVICE LIFE COMPLETE (Stored, SLC)** - Completed service life aircraft being retained in storage (also known as Contingency Reserve).
- ACTIVE PROGRAM AIRCRAFT** - Operating and pipeline aircraft.
- INACTIVE PROGRAM AIRCRAFT** - Program aircraft which are either grounded administratively, stored, or in the process of first delivery (new aircraft).
- FUTURE DRONE CONVERSION** - Non-program aircraft being held in a storage facility pending conversion to a drone configuration.
- LOCATION** - Data are shown by location in tables 8, 8A, 10, 10A, 11, 11A and 14. Location refers to the physical location, at month end, of the unit having reporting custody of the aircraft.
- REWORK** - The restorative or additive work performed on an aircraft or aircraft equipment by Naval Aircraft Rework Facilities, contractors plants and other industrial establishments designated by competent authority. STANDARD REWORK, comprises one of the processes intended to prepare the aircraft to operate through the next full service tour or period. SPECIAL REWORK entails one of the processes intended to repair, modify or modernize the aircraft without direct effect on service life.
- UPKEEP** - Aircraft maintenance work performed by operating unit personnel as opposed to industrial establishment personnel.

MISCELLANEOUS		NOTES:									
Bailment (Note 4)	Test Aircraft	TJ	1. A "B number" or "C number" status means that the aircraft could be changed to an operating (A number) status without undergoing Standard or Special Rework. The second character of the B number and C number code shall be selected to indicate the primary use of the aircraft when it is next assigned to Operating								
	Test Support Aircraft	TK	2. Use status code BA, BB, BC, BD or BE to indicate an aircraft in the "First delivery" process which has a discrepancy pending completion, modification or installation work to be performed by NAVAIRSYSCOM FS								
	Contract Pending	TR	3. Storage aircraft retained for future drone conversion will be indicated by the addition of code letter "K" to the appropriate storage status code. Example - Code "MSK" would indicate a flyable, undamaged aircraft not completed service life, standard rework required being held in reserve stock retention category for Future Conversion to Drone configuration "IMPORT-ANT". In the absence of specific instructions from NAVAIRSYSCOM as to retention category, code all Reserve/Retention aircraft to reflect Stored, SLNC "								
Loan (Note 4)	By the Navy		4. CNO approval is prerequisite before change to a Bailment or Loan status								
	Not RDT&E	U	5. Status code "V letter" will be used to indicate that the aircraft has been accepted provisionally or under special conditions pending completion of work by the air frame contractor								
	Test Aircraft	UJ	Use code VN, VP, VQ, VR or VS to indicate the major area of discrepancy as airborne equipment, electronics, armament, photo equipment or power plant respectively								
	Test Support Aircraft	UK	6. Status code BY may be used on aircraft in the reporting custody of an operating command to reflect RFI aircraft in the physical possession of a NAVAIRSYSCOM activity								
	To the Navy		7. NAVAIRSYSCOM FS custodians shall never report aircraft in status codes A1 through AK or B1 through BK								
	Not RDT&E	U5									
	Test Aircraft	U6									
	Test Support Aircraft	U7									
Provisionally Accepted	V letter (Note 5)
