31 October 1957

OPNAV NOTICE 03110

From: Chief of Naval Operations
To: Distribution List

Subj: Allowance and Location of Navy Aircraft

1. Purpose.

a. To indicate the following by units:

- (1) The operating aircraft allowances (Table 1)
- (2) The actual on hand aircraft inventories (Table 2)

b. To show the actual on hand program and non-program aircraft inventory in various forms (Section II).

2. General Instructions.

a. This NOTICE establishes the unit operating allowances of the Naval Aircraft Program within each major operating command. Actual on hand aircraft inventories are developed by the Navy Aircraft Accounting System, OPNAV INSTRUCTION 5442.2. The planned assignments of Tables 2 and 3 are omitted from this issue of the Blue Book. If considered desirable, this information will be reinstated when the planned assignments become compatible with the fiscal year 1958 allowances as set forth in Table 1.

b. If the allowances as set forth are not deemed suitable for the mission which an activity or command has to support, the Chief of Naval Operations will consider recommendations for changes in types and allowances of aircraft. However, any requests for such changes that would result in an increase in a major command's total aircraft operating allowance should contain that command's recommendation for a compensatory reduction.

c. Major operating commands are authorized to shift operating assignments (Table 2) from one unit to another on a temporary basis; however, if it is expected that this shift will exceed three (3) months, the Chief of Naval Operations shall be requested to change the authorized operating allowance (Table 1).

d. Specific assignment of aircraft to individual officers is prohibited by the Secretary of the Navy. Aircraft for shore based activities not listed in Table 1 are provided within the allowances of Naval Air Bases, the Naval Air Reserve Training Command, the Naval Air Training Command, and the Bureau of Aeronautics (Research and Development).

e. Types, classes and models of aircraft listed herein are in conformance with BUAER Technical Note 3-56.

f. Planned operating levels of target drones (capable of carrying a pilot) are contained in OPNAV INSTRUCTION 03110.1 (U. S. Naval Aircraft Program).

3. Cancellation. This NOTICE is cancelled and will be destroyed by burning when the next issue is received. No report of destruction is necessary.

Wm E. Gantner

TABLE 1 PROGRAM OPERATING ALLOWANCES FOR FISCAL 1958 6

TABLE 2 LOCATION OF TOTAL PROGRAM AND NON-PROGRAM AIRCRAFT INVENTORY 16

TABLE 3 SUMMARY OF OPERATING INVENTORY BY MODEL .. . 46

TABLE 4 TOTAL PROGRAM AND NON-PROGRAM AIRCRAFT INVENTORY BY LOCATION AND ORGANIZATIONAL UNIT 54

GENERAL

The Navy Program aircraft inventory is presented herein in three arrangements:

- TABLE 2 is by type of reporting custodian within each command showing, for each unit and model of aircraft, location, authorized operating allowance, and actual inventory.
- TABLE 3 is a summary of the actual operating inventory by major commands for each class, configuration and model in the program.
- TABLE 4 is in alphabetic order of geographic location except that carriers and other ships are listed first showing for each location the "reporting custodians" or "unit" based there, the total aircraft in custody of each, a code designation of their respective "command", and the page number where more detailed information may be found. The column headed Command contains their code designations, which are translated as follows:

- 11.....LANT.....Atlantic Fleet (Navy)
- 19.....LANT.....Atlantic Fleet (Marine Corps)
- 21.....PAC.....Pacific Fleet (Navy)
- 29.....PAC.....Pacific Fleet (Marine Corps)
- 31.....NABS.....Naval Air Bases (Navy)
- 39.....NABS.....Naval Air Bases (Marine)
- 41.....NABTC.....Naval Air Basic Training Command
- 43.....NAATC.....Naval Air Advanced Training Command
- 44.....NATTC.....Naval Air Technical Training Command
- 50.....NART.....Naval Air Reserve Training Command
- 70.....R&D.....Research & Development, BUAER
- 88.....BUAER.....Field Activities, Bureau of Aeronautics

The above classifications are for logistic purposes and statistical convenience and in no way alter any organizational structure or military command established elsewhere by the Navy.

SECTION II

STATUS OF NAVY AIRCRAFT INVENTORY 57

CONFIDENTIAL

STATUS CODES

Table two of this report includes a column headed "STATUS" which refers to aircraft status code classifications as defined in OPNAV INSTRUCTION NO. 5442.2 For full status code definitions, see reference.

AIRCRAFT STATUS CLASSIFICATIONS	AIRCRAFT STATUS CODES					
	THE PROCESS	IF IN THE PROCESS	IF AWAITING THE PROCESS (OR AWAITING TRANSFER ELSEWHERE FOR THE PROCESS)		IF ENROUTE TO THE PROCESS	
			Flight	Surface Transport		
OPERATING Primary Use:	A-number, aging in tour, A-letter, not aging in tour	If in operating command	If In BUAER			
Combat	A1 AJ	B	B if completely ready for issue; B # to indicate material lacking:	C	C9	
Combat Services	A2 AK	B	B1-Airborne Equipment	C	C9

DECLASSIFIED

TABLE 1 PROGRAM OPERATING ALLOWANCES FOR FISCAL 1958

Table 2 reflects planned aircraft model assignments to meet the allowances shown in Table 1. In instances where the Naval Aircraft Inventory contains insufficient aircraft of the types shown in Table 1, Table 2 will indicate substituted models. The Primary operating status code included in Table 1 reflects the primary reason or intent for the operating units having an authorized operating allowance therefore. Where inconsistencies appear between the status codes listed in Table 1 and Table 2, differences will be resolved in favor of those listed in Table 1. Revisions to the authorized allowances listed in Table 1 will be indicated by an appropriate symbol for subsequent periods; however, because of budgetary considerations such revision will normally not appear at intervals of less than four months.

TABLE 2 LOCATION OF AIRCRAFT INVENTORY AND PLANNED OPERATING ASSIGNMENTS

BY COMMAND AND UNIT
30 SEPTEMBER 1957

Table with columns for R&D UNIT, LOCATION, MODEL, INVENTORY (STATUS, NO. OF A/C), and PLANNED ASSIGNMENTS (31 DEC 1957, 31 MAR 1958, 30 JUN 1958, 30 SEP 1958). Rows list various aircraft units and models like ANACOSTIA, ANCHORAGE, BOSTON, etc., with their respective inventories and assignments.

STATUS OF NAVY AIRCRAFT INVENTORY

SCOPE OF SECTION II

Included in Section II are selected inventory statistics for all Navy aircraft except non-man-carrying target drones and guided missiles. (Man-carrying drones and aircraft on loan to Navy are included in special tables, but are not considered a part of the Navy aircraft inventory.) Succeeding tables and listings represent successive breakdowns, in varying degree of detail, of current TOTAL INVENTORY.

Total inventory is divided into PROGRAM and NON-PROGRAM aircraft. Program aircraft are production aircraft in physical custody of the Navy for which current or future operation within an authorized operating allowance is intended or can reasonably be expected. Non-program aircraft include those of experimental and service test (BIS) configuration aircraft retired but not yet stricken, aircraft otherwise in process of final disposition, contingency reserve, and aircraft on bailment or on loan.

Navy aircraft "inventory" is comprised of all aircraft which have been accepted, but not stricken, by the Navy. An aircraft is accepted when legal custody is assumed by the Navy, and is stricken when officially separated from Navy custody by the signature of the Deputy Chief of Naval Operations (Air) to the monthly notice "Separations From and Reinstatements to the Navy list of aircraft."

Navy aircraft are presented under three basic classifications: STATUS, KIND OR CLASS and CONFIGURATION, and CUSTODY. "Status" refers to the classification of the functional employment or condition of aircraft; that is, generally, either undergoing, awaiting, or enroute to either operating, standard rework, special rework, storage, final disposition, or evaluation to determine next action. "Kind or Class and Configuration" refers to physical characteristics; as to general mission purpose of Navy aircraft design, e.g., fighter, attack, patrol, transport, etc. "Sub-Class" refers to the next lower level of classification into more specific mission purpose of design, e.g., all-weather, photographic, etc. "Custody" refers to organizational location; that is, administrative control of assignment, logistic support, and employment of aircraft; and, responsibility to account for and otherwise provide information about aircraft.

STATUS OF AIRCRAFT

Every aircraft is either Program or Non-Program. Every Program aircraft is either OPERATING, LOGISTIC SUPPORT, or RESERVE STOCK. Every Non-Program aircraft is either AWAITING DECISION or STRIKE, CONTINGENCY RESERVE, EXPERIMENTAL, on BAILMENT and LOAN CONTRACT, or BOARD OF INSPECTION and SURVEY (BIS) aircraft. Every Program aircraft is either OPERATIONAL or NON-OPERATIONAL. All aircraft in controlling custody of operating commands are operational and are either OPERATING or in OPERATIONAL POOLS. All aircraft in the custody of the Logistic Command (BUAER Field Activities) are NON-OPERATIONAL, and are either NON-OPERATIONAL SUPPORT or RESERVE STOCK. LOGISTIC SUPPORT is made up of all aircraft in OPERATIONAL POOLS and NON-OPERATIONAL SUPPORT.

OPERATING aircraft are those in the custody of an organizational unit, pursuant to planned operating assignments or authorized operating programs therefor, for flight operations (other than for ferry or flight test) required in performance of a mission of the unit. More specific principles are as follows:

1. Generally, an aircraft is in operating status whenever filling an authorized operating allowance; that is, if an operating unit has reporting custody of the aircraft because of its authorized operating allowance, the aircraft is in operating status.
2. "Operating" status is primarily a matter of CUSTODY, only secondarily of CONDITION. "Operating" refers to operating unit aircraft; it does not necessarily mean aircraft in a condition to be operated (Flown), which is a matter of "availability." Condition is a factor rendering an aircraft "non-operating" only when its condition is such that there is no longer any good reason for the operating unit to retain custody of it; that is, in such condition that it will be or should be either replaced and/or transferred out of the unit's custody or stricken, before flown again in performance of the unit's mission. Another way of expressing the foregoing is that an aircraft filling an authorized operating allowance of an operating unit is in "operating status" until the unit will not, cannot, or should not fly it any more and it is (or should be) stricken and/or replaced. If an aircraft is retained in reporting custody of an operating unit for maintenance of other rework in restoring it (or preparing it) for further flight operations by the unit, it remains in operating status, UNLESS a temporary replacement for it is made, in which case the replacing aircraft is in operating status while the replaced aircraft is in a non-operating status.
3. As a guide to application of "operating status", some features of the Naval Aviation system for planning and control of aircraft programs should be understood. Congress authorizes (and provides funds for) the Navy to OPERATE a given number of aircraft. The Chief of Naval Operations then breaks that number down into OPERATING AIRCRAFT ALLOWANCES for each OPERATING UNIT; then calculates how many more aircraft (non-operating, i.e., operational pool) each OPERATING COMMAND will need to keep the operating units up to allowances; then collaborates with the Bureau of Aeronautics in actually providing each operating command with enough of the right kinds of aircraft so that operating units will actually have the aircraft they are intended (allowed) to have. The Chief of Naval Operations and others then want to know to what extent operating units do have the aircraft allowed; and Congress wants to know to what extent the Navy implemented the operating aircraft program it approved and provided funds for. This information is obtained by counting the aircraft which reporting custodians show by OPNAV X data to be in OPERATING STATUS. Observe that

~~CONFIDENTIAL~~

DECLASSIFIED

~~CONFIDENTIAL~~

59

neither Congress nor CNO approved, or authorized, or allowed, or funded for a given number of aircraft to be in a condition of flyability, or performance ability, or availability, or readiness; but instead, when referring to "operating aircraft", their intentions are stated in terms of AIRCRAFT WHICH OPERATING UNITS ARE TO HAVE.

4. A related feature of the Navy's aircraft logistics system needs to be understood; that is, an aircraft completes a standard service tour (becomes due for overhaul) by having accumulated a prescribed length of time in operating status (expressed as a given number of OPERATING MONTHS). Information as to just how much operating time (months) has been accumulated permits a reasonable prediction as to just when the aircraft must be replaced and turned into BUAER for overhaul. The assignment of operating status to an aircraft thereby directly effects its future life (service usage, deployment, rework, distribution, return, etc.); while "non-operating status" merely reflects what is or was.

LOGISTIC SUPPORT are those Program aircraft, in non-operating status, which are actively engaged in normal progress through standard service life. This includes periods of "idleness" considered to be normal requirements (e.g., operational pool aircraft for replacement of aircraft losses, overhaul backlog to ensure steady input, etc.), and also includes whatever special rework becomes necessary or desirable during the service life of aircraft. Logistic Support aircraft shown here are either in OPERATIONAL POOL, DELIVERY, IN REWORK, or AWAITING REWORK.

OPERATIONAL POOL aircraft are all non-operating aircraft in controlling custody of operating commands. These are aircraft in custody of operating commands, in addition to operating aircraft allowances, for the purpose of maintaining the intended quantity and quality of operating aircraft. More specifically, aircraft for immediate replacement of operating aircraft lost and damaged; aircraft involved in special rework within the operating command; aircraft enroute to and from BUAER delivery points, and between reporting custodians of the operating command; and aircraft otherwise in direct logistic support of operating aircraft.

RESERVE STOCK aircraft are all program aircraft in the controlling custody of BUAER FA which are not currently and actively engaged in any of the various logistic processes required in normal transition through standard service life. Note that "actively engaged" will include normally required idleness (wherever idleness is a normal requirement of service life, aircraft are logistic support, not reserve stock).

KIND OF AIRCRAFT

Aircraft are classified as to "kind" by TYPE, or physical construction, and by CLASS or purpose of mission for which designed or modified with further sub-division of each for more specific characteristics.

As to TYPE, every aircraft is either heavier-than-air (HTA) or lighter-than-air (LTA or Z). Every heavier-than-air aircraft is classified as either a fixed-wing airplane (V), a rotary-wing airplane (H), or a pilotless aircraft (K).

Each class of aircraft may be further classified as to sub-class. Sub-class designations are abbreviated in various places in this publication as follows: (AW) All Weather, (H) Heavy, (I) Intercept, (J) Jet, (KD) Drone and Drone Control, (L) Land, (M) Medium, (ME) Multi-Engine, (NAV) Navigation Trainer, (PROP) Reciprocating Engine, (S) Sea, (SAR) Sea Air Rescue, (SE) Single Engine. (TOW) Target Tow, and (WEA) Weather Reconnaissance.

Further as to CLASS, aircraft are characterized as to VERSION of basic design by letter designation (as the N in F3H-2N) as follows: A-Amphibious, B-Special Armament, C-Carrier Operating, D-Drone Control, E-Special Electronics, K-Target Drone, L-Winterized, M-Guided Missile Carrier, N-All Weather Operating, N(A)-All Weather version stripped for day attack, P-Photographic, Q-Countermeasures, R-Transport, S-Submarine search and attack, T-Training, U-Utility, W-Airborne Early Warning, Z-Administrative. The suffix letter "X" is used to denote that a conversion to that model has not been completed. Upon completion of the conversion, the suffix letter "X" is dropped.

Certain models (not individual aircraft) of combat classes are designated as COMBAT FIRST LINE aircraft to characterize those models with suitable military characteristics and performance to engage in unlimited combat operation. All other models of combat classes and COMBAT SECOND LINE, as models which are suitable for service but whose deficiency in military characteristics and performance entails a recognized handicap for unlimited combat services.

CUSTODY OF AIRCRAFT

Every Navy aircraft is in custody of either a MAJOR OPERATING COMMAND or the Field Activities group of the Bureau of Aeronautics (the "LOGISTIC COMMAND"). Major operating commands and BUAER FA are sometimes referred to as "controlling custodians". A "reporting custodian" is the squadron, air station, or other activity in the lowest echelon of command in custody of aircraft for which the unit has reporting responsibility to CNO. Every reporting custodian of Navy aircraft is classified under some controlling custodian.

Refer to Section I for complete listing of "reporting custodians" by "controlling custodians".
