

GULFSTREAM SRA-4 ADMINISTRATIVE TRANSPORT

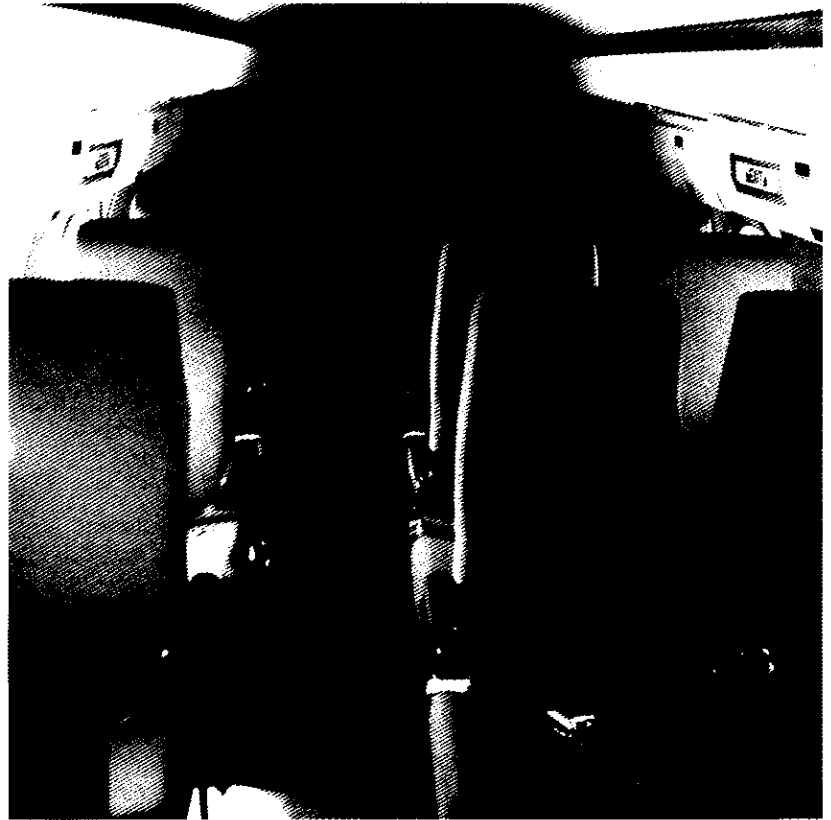

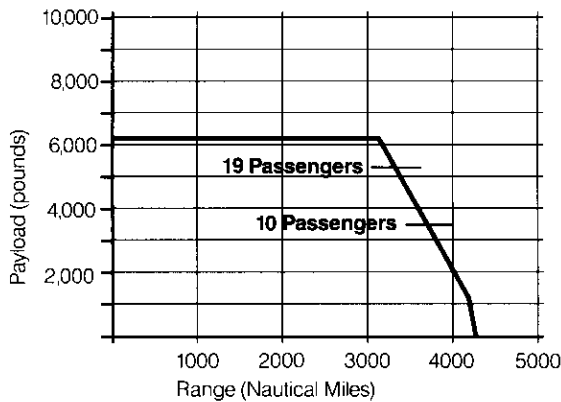

Capitalizing on the basic design concept of all Gulfstream aircraft, the Gulfstream SRA-4 provides an ideal vehicle for airliner-type administrative transport.

In this role, the Gulfstream SRA-4 offers maximum flexibility in mission planning and aircraft scheduling, since it can perform multi-stop missions without refueling, as well as long-range non-stop flights.

The diagram below shows a typical 19-passenger configuration in the Gulfstream SRA-4. The aircraft can be outfitted for as many as 27 persons in an airliner-type seating arrangement without compromising passenger comfort or galley and lavatory facilities.

Administrative Transport Mission Payload vs. Range

3 crew, Mach .80 cruise, IFR reserves,
Zero wind, ISA

The Gulfstream SRA-4, with its superior environmental control system and extremely low interior noise levels, provides unsurpassed levels of comfort for passengers and crew.
