No. 258.

CONDITION AND DISPOSITION OF THE NAVY.

[The following documents were communicated, at the 1st session of the 18th Congress, by the President of the United States, with his message of December 2, 1823.]

SIR:

NAVY DEPARTMENT, December 1, 1823.

In obedience to the request contained in your letter of the 10th instant, I submit, respectfully, the following statement of the administration of this Department during the present year, comprehending the number of vessels commissioned; the number in ordinary, fit for service, or requiring repairs; the progress made in building vessels; with the disbursements of the Department, and the service in which the vessels have been employed; with such observations on the whole subject as are deemed proper."

Letter from the Commissioners of the Navy, with papers A, B, C, D, and E, which accompany it, exhibit—

1. The vessels of war in commission, with the service in which they are employed. (See A.)
2. The vessels in ordinary on the Atlantic board and on the lakes, with the state of repairs of each vessel. (See B and C.)
3. The progress made in building under the law "to increase the navy of the United States." (See D.) By this it appears that four ships of the line have heretofore been built, and that five ships of the line and five frigates of the first class are now building; some of which *might* be launched in thirty days, and all, except one, in one hundred and twenty days.
4. A general view of the improvements at the several building yards. In some of the yards additional improvements are now necessary for their comfortable and economical administration.

5. The disbursements of the Department during the first three quarters of the present year, up to the 30th of September. The disbursements of the year 1822 appear by the report made to Congress in the month of February last. It appears that \$1,984,520 74 have been drawn from the Treasury between the 1st of January and the 30th September, leaving, on the latter day, \$2,218,168 66 unexpended of the amount applicable to the service of the
